ocelot

Big Cats of the Rainforest

Here are three options for the title page. Make your own with the blank cover or use one of the others for an easier start. Layer your pages from shortest to longest. Write the animals' names on the tabs. (See completed book picture to the right.)

All clip art is from etc.usf.edu.

The mini book orders the rainforest cats from smallest to largest. Size order of the big cats: #1 Tiger, #2 Lion, #3 Jaguar, #4 Leopard. The ocelot is quite small. (And the lion is not a rainforest animal at all.)
