

Snake Circle book

The photo above shows how the circle book will unfold to reveal your snake.

Print the template on cardstock. Color snake as desired. Cut out the circle, and fold it into fourths with the snake inside. Then choose any one of the folds to cut. Cut from the outside edge to the exact center. Now your book can fold up on itself into a wedge shape. Give your book a title on the cover. Write text or draw images on the next two pages. Your book will unfold to reveal the rainforest snake. You can affix your snake book directly into your lapbook or make a pocket for it.
